### ▼ HAPPENING NOW

Flexifinger.com is finalizing the development of an interactive product selector to assist dealers and end-users to choose the best lifter. Select different criteria such as crop type, soil type and ground conditions to view the different possible lifters that may work in those conditions. Follow the links to each product's page to explore the options and to make the best choice. Expected to launch in August 2016.

### ▼ UPCOMING EVENTS

**August 2 - 4**  
**Minnesota Farm Fest**  
 Gilfillan Estates, Booth 535N  
 Redwood County MN

**August 16 - 18**  
**Dakotafest**  
 Schlaffman Farm, Booth 138W  
 Mitchell SD

**September 13-15**  
**Big Iron Farm Show**  
 Red River Valley Fairgrounds,  
 Booth H-21  
 West Fargo ND

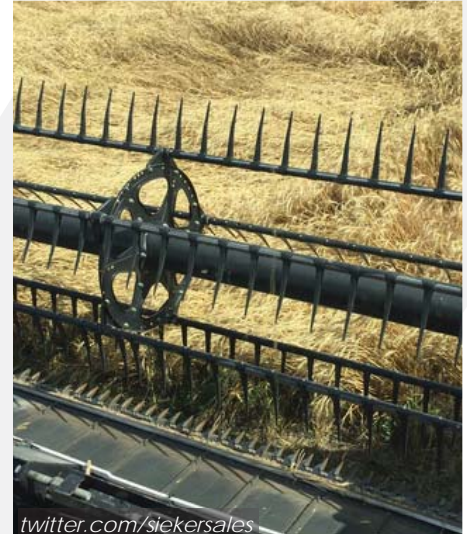

**September 13-15**  
**Canada Outdoor Farm Show**  
 7th Lane South Middle  
 Woodstock ON

### HELPING WITH HARVEST

It's safe to say that the 2016 season has been on the wet side - there has been a lot of rain in Canada, the US and Europe. With this type of weather, many crops will become lodged, resulting in the need for crop lifters.

Rice County, KS has lodged wheat crops and Brian Sieker of New Ag Supply in Chase, KS has been equipping headers with the Flexi-Float™ 250. Using an app, Brian even live-streamed a portion of wheat harvest which Flexifinger broadcast at its booth at the Canada Farm Progress Show in Regina, SK on June 17. "Yes they work and can leave more stubble without scalping the soil," tweeted Sieker on June 16.

Most of New Ag Supply's orders have been for the 20235 shoe,

*twitter.com/siekersales*

which has proved effective in this area's wheat crops. The length of the 250's arm plus the added reach of this shoe have resulted in the ideal combination for farmers.

Thanks to Brian at New Ag Supply for sharing your harvest with the Flexifinger Network! ■

## MICHELE BURTON

Position: Office Administrator

If you have called the Flexifinger Head Office, chances are pretty high that you have spoken with Michele, our cheerful and friendly Office Administrator who answers the phone at least 75% of the time. Michele also takes care of coordinating most of our company marketing, which includes the editing of many of the videos shown on our YouTube channel and at trade shows. She's also the voice of some of our radio ads and the Flexifinger song!

Michele has worked for Flexifinger since 2015 and has used her many talents and skills to advance the marketing and administration teams. ■

### FlexxiFloat™ 250 Crop Lifter

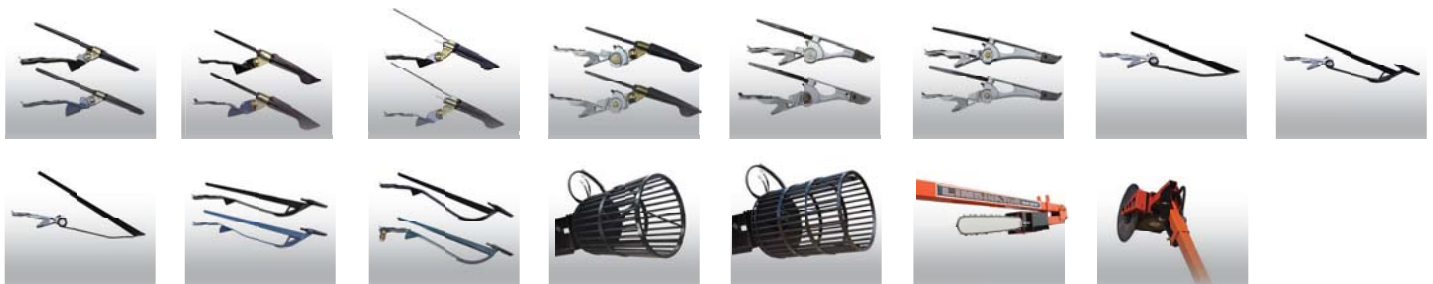

Benefits: adjustable, universal fit, QD™ compatible

The FlexxiFloat™ 250 crop lifter has been designed specifically for use where ground conditions are uneven in taller, heavier foliage crops. The FlexxiFloat™ 250 has a pivot which allows the lifter to follow the fluctuations of the ground. Different lifter/shoe combos can be customized and interchanged to suit a wide variety of ground conditions and crops. The FlexxiFloat™ 250 is available with two rail options: the standard rail and the high-pivot rail. The standard rail is generally used with a rigid header, while the high-pivot rail is used with a flex header, with the exception of a few specific makes and models of header and feeder house combinations. Made of sturdy cast metal, this lifter is capable of standing up to even the most challenging ground conditions. ■
