

## Limbinator Saw™

No more ladders, lifts or buckets, hand saws, pole pruners or hand-held chainsaws – change the way you trim trees with the Limbinator Saw™. It mounts directly to the front end loader of your tractor, skid steer or backhoe. The commercial-grade chainsaw attaches easily to a receiver and connects to the loader or tractor's auxiliary hydraulics. Trim tree limbs up to eight feet higher than the loader can reach.
